

To use short division to divide 3-digit numbers

$$186 \div 6 = 031$$

no groups of 6
can be made

$3 \times 6 = 18$

$1 \times 6 = 6$

Mastery: To explain mistakes in calculations using short division

Jamie is using short division to divide 3-digit numbers.

He has done these calculations but he isn't sure if they are right. You need to check them for him.

You will need to **fully explain any mistakes** you find so Jamie can know what he will need to do next time.

Key Vocabulary: hundreds, tens, ones, column, groups of, exchanged, place value, place holder

First one: he think that 7 lots of 6s go into 37, but only 6 do. It should be 63.

Second one: He has forgotten to put a 0 in the tens column as a place holder, so it should be 101.
